SAP · Advanced Excel · AutoCAD · OPUS
(Presto equivalent) · LV/MV Installations ·
NEC/IEC/NOM Standards

Languages

Spanish (native)
English B2

Awards & certifications

Artificial Intelligence: Principles & Applications, Universidad del Valle de México · August 2026

Digital Leadership Programme, INESDI Business TechSchool · April 2025

Profile

Electrical engineer with an M.S. in Business Analytics & AI (top of my cohort, 8.94/10) and 2 years on industrial projects for Microsoft and BMW Group. I specialise in process automation with n8n, RAG systems and AI web applications, with my own products in real use. I am looking to join a company as an AI or automation developer.

Work experience

Founder · AI & Automation Engineer
EG Solutions · Madrid (remote)

2026 — present

- Design and development of web platforms, n8n automations and AI agents for businesses.

Electrical Installations Coordinator

Jan 2024 — Feb 2025

DEMEK S.A. de C.V. · Querétaro / San Luis Potosí, Mexico

Industrial electrical and mechanical contractor in Mexico since 1994: 350+ employees and 900+ contracts.

- Coordinated the outdoor electrical installations at **Microsoft's Azure hyperscale Data Center** in Querétaro, directly supervising **60+ people**: 35 kV medium voltage (about **13,000 m** of cable in a redundant system), grounding, **6 transformers and 6 generators** of up to 3,000 kVA / 3,000 kW, and switchgear.
- At **BMW Group's plant** (San Luis Potosí, 19,847 m² body-shop expansion): supervised LV and grounding in 2 sections (~40 people) and managed **100+ material requisitions** for nearly all 8 sections with my own tracking system (Excel + SAP). It cut supply stoppages and uncovered cable ordered above budget and cable theft, which led to tighter security.
- Verified compliance with NEC/IEC/NOM technical specs and safety standards on-site throughout the full project lifecycle for both sites.

Electrical Estimator

Jan 2023 — Jan 2024

DEMEK S.A. de C.V. · Chihuahua, Mexico

- Ran the full estimating cycle (AutoCAD takeoffs, OPUS pricing, vendor quotes and client delivery) for **30+ bids up to USD 500K**. Won the **Terex project in Nuevo León**, presenting directly to the client in English through Copachisa.

Selected projects

PDF Technical Assistant

pdf-tech-assistant2.vercel.app/demo

Each company uploads its technical PDFs and chats with them: answers come only from the documents, tailored to the company's specialty, and personal data is anonymised before indexing. Multi-company with roles, delivered as SaaS or on-premise with Docker.
React 18 · TypeScript · Supabase Edge Functions · pgvector · Gemini

CoverCraft

coverletter2.vercel.app

Cover letters tailored to each job, a free CV builder that imports your PDF, a fit score against the offer, a CV adapted to each job (Pro), application tracking and interview prep. In real use, freemium.

Next.js 16 · TypeScript · Supabase (RLS) · n8n · Gemini

Carolina Guijarro · Professional website

carolinaguijarro.es

Four-page website for a team-engineering consultant, with a contact form that saves every lead to Google Sheets and emails her a branded notification. Live.

React · TypeScript · Tailwind CSS · n8n · Resend

Education

M.S. in Business Analytics & Artificial Intelligence

INESDI Business TechSchool · Madrid, Spain · 2026

Top academic record of the cohort (8.94/10). ETL/ELT, RAG architectures, applied machine learning and Power BI.

B.S. in Electrical Engineering

Instituto Tecnológico de Chihuahua · Mexico · 2023

Major in electrical installations. GPA 9.27/10. President of the Electrical Engineering student committee.
